

ABLEKUMA CENTRAL MUNICIPAL ASSEMBLY

ENVIRONMENTAL HEALTH AND SANITATION UNIT

7th April, 2022

INTRODUCTION

Science and Gender equality are both vital for the achievement of the internationally agreed development goals, including the 2030 Agenda for Sustainable Development. Over the past decades, the global community has made a lot of effort in inspiring and engaging women and girls in Science. Yet women and girls continue to be excluded from participating fully in science.

The Science Education Unit (National Stem Centre) of the Ghana Education Service (GES) in collaboration with United Nations (UN), celebrated International Day for women and Girls in Science on the theme “ Equity, Diversity and Inclusion: water unites us”.

OBJECTIVES

To achieve full and equal access to and participation in science for women and girls and further achieve gender equality and the empowerment of women and girls.

PARTICIPATION

Environmental Health and Sanitation unit was invited to give a talk on “ Galamsey activities have polluted water sources in our community with chemical and waste substances. How can we use scientific and technological approaches to make the water clean for domestic use”

The Municipal Environmental Health officer gave the talk and supported by the deputy.

Pre-school, primary, junior high school and senior high school teachers and students within Ablekuma Central Municipality participated in the event. They asked questions and contributions on the topic.

Below are some pictures depicting the activity of the day.
